

# Zayo Europe provides best physical diversity and low latency connectivity between key European financial markets

Customer: Global Managed Infrastructure and Hybrid Solutions provider, headquartered in London.

## Challenge

A service provider delivering managed infrastructure services & hybrid connectivity solutions to a global client base, needed high capacity, low latency connections between key financial markets that included Frankfurt Equinix FR2 to Zurich Equinix ZH4 (SIX Exchange), Slough Equinix D4 to Milan Aruba IT3 (Euronext Exchange), Chicago 350 Cermak to Tokyo CC2 (JPX Exchange) and London to New Jersey

## Solution

With our wholly owned and operated fibre infrastructure, and utilising the density of our pan-European network - we provided the lowest latency, most secure and reliable connections needed for financial market connectivity using;

\*Dark Fibre

\*Private Network

\*Wavelength

• Additionally, we kept their cost-of-change neutral, for migration from their existing network solution, by offering a delayed billing model

## Result

- The highest network reliability and security delivered in seven days
- Easy cost-neutral migration
- Ongoing support from Zayo experts in service delivery, solutions engineering, project management, and network operations
- The customer chose Zayo for our strong track record of providing secure, reliable low-latency connectivity for financial markets.
