

Dedicated Bandwidth in 5 working days with Waves On Demand in Europe

400G fully enabled lit-fibre Wave routes across Europe

Problem

Ordering and turning up Wave routes can be a long and tedious process, one that has only worsened in recent years thanks to economic and macro-environmental factors. What has sped up is the increased demand for bandwidth and how quickly customers require it.

Solution

Zayo Europe now offers 100G Wave routes delivered in 5 working days - industry-leading fast!

This service is now available across the key European hubs of Frankfurt, London, Amsterdam, Paris, Marseille and Bordeaux. It is also coming soon to Dublin, Milan and Manchester. Leveraging our owned metro fibre assets, this infrastructure will reach the large majority of key data centres in these cities. This also means that all of our wave route delivery is now faster than ever.

Features:

Lead times

PoP to PoP are reduced down to 5 working days

Capacity Management

These routes are proactively managed and constantly upgraded

Order Process

Ordering is quick and easy through your Account Manager

Availability

Waves are already provisioned in key data centres, ready to go in 40 direct data centre routes now

Benefits:

The Fastest Connections

- Transfer large volumes of data between global locations with the fastest, most direct, most predictable long-haul and metro network connections
- Turn up Zayo's hand-picked Waves On Demand in 5 working days, significantly reducing service delivery intervals
- Tap into Zayo's ultra-low latency routes in key markets, supporting the most bandwidth-intensive applications

Unparalleled Customisation

- Custom-build a diverse, redundant Wavelength network suited to your unique needs with commercial flexibility and protection options
- Zayo provides extensive expertise in building custom Wavelength solutions, reducing network complexity and costs

Efficiency and Scalability

- Seamlessly add more bandwidth on a dedicated circuit with Zayo's full range of Wavelength offerings, reaching 800G bandwidth capacity
- Receive 24/7/365 support and service from Zayo's Network Operations Centre
