

Zayo Gives Large Investment Bank Greater Network Visibility and Helps Modernize its IT Stack

Challenge

- The investment bank wanted to **move from its existing data centre to larger, more modern data centre facilities**
- Much of its IT stack was on-premises and **relied on ageing data centre and network solutions**
- The company had **a long-standing positive reputation to uphold** with customers and as a company that invests in its people and technology, requiring a seamless data centre transition

Solution

Zayo ensured a **smooth migration to new data centres and reliable, secure connectivity** using:

Dark Fibre

ELAN

Waves

Dedicated Internet Access

Result

- High levels of network **reliability and security**
- **Full network transparency** that's easy to access and understand for all customer contacts
- **Lowered carbon footprint**, critical to attaining sustainability goals
- **Ongoing support** from Zayo experts in service delivery, solutions engineering, project management, and network operations
